

# User Manual for Retweet Lucky Draw

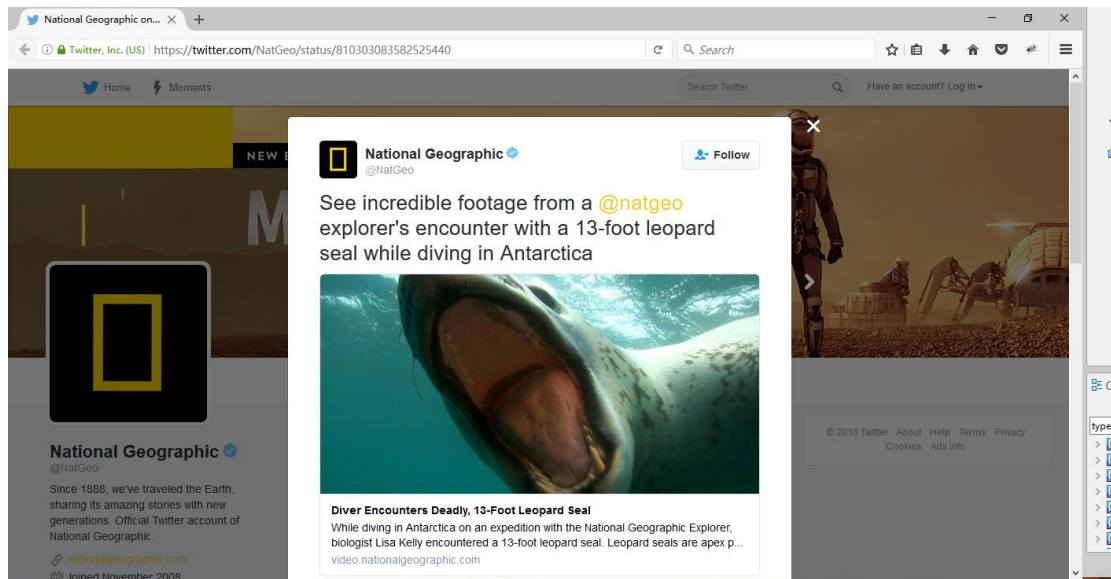

This application lets you pick any of your tweets on twitter and pull a prize for one of the retweeters. This can come in handy when you are in need of advertising something but don't want to spend too much money. In turn you just claim a prize that's attractive to the majority, and grant it to one of the users that retweets a specific tweet you posted. Here's how it works (it is advised that the tweet you choose has a unique tag or link):

1. Open <http://104.238.223.24/index.php> in your web browser.

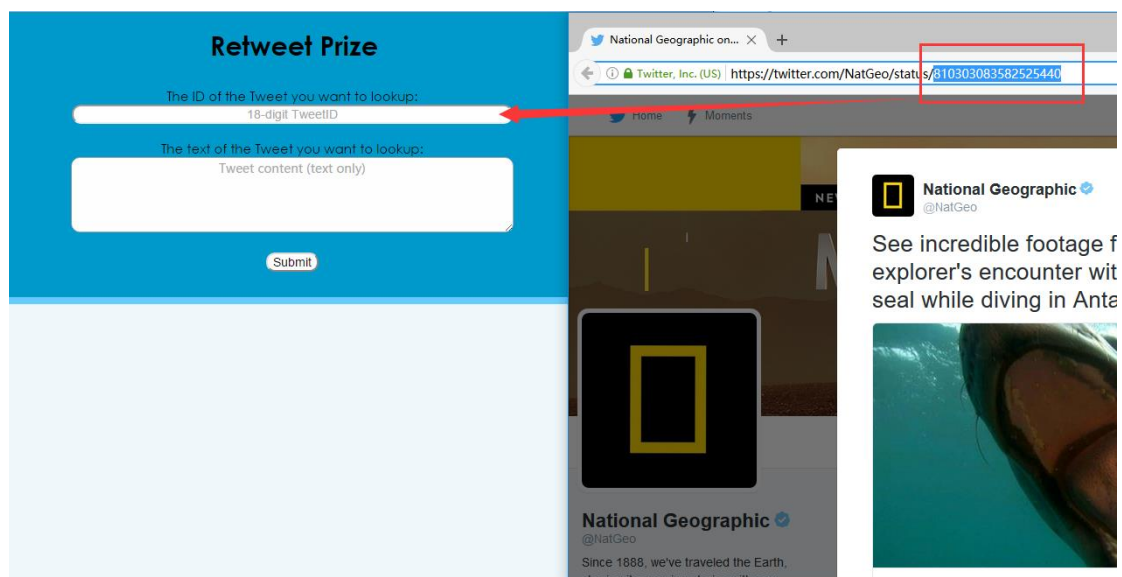

The screenshot shows a web application titled "Retweet Prize" on a blue background. It features two input fields: the first is for "The ID of the Tweet you want to lookup:" (18-digit TweetID) and the second is for "The text of the Tweet you want to lookup:" (Tweet content (text only)). Below these fields is a "Submit" button. A large, empty light blue rectangular box occupies the center of the page. At the bottom, there is a "Draw Winner!" button and a copyright notice "© Gary U - 2016".

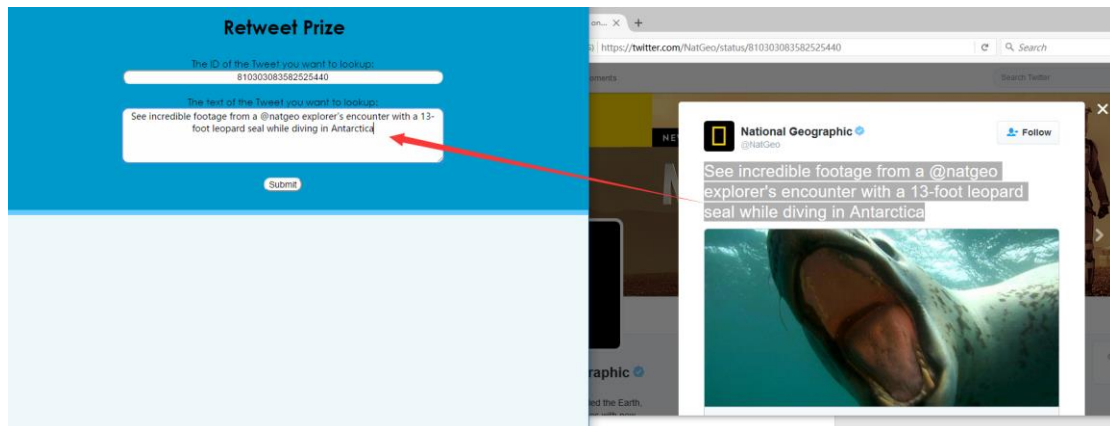

2. Open [Twitter.com](https://twitter.com) and click on your specified tweet,

3. In the Address bar select all the digits after the last anti-slash( / ), copy and paste it to the first box of the website you opened in step one, which says "The ID of the Tweet you want to lookup:"

4. SELECT all the *text field* of your tweet (to ensure the maximum accordance of search results.), copy and paste it to the second box of the Retweet Prize website (the one that says “The text of the Tweet you want to lookup:”).

5. Click 'Submit'! And We're all set! You either get information on all the retweets possible to be captured by this app, or get to know the winner for this specific tweet' Lucky Retweet Draw.

Retweet Prize

The ID of the Tweet you want to lookup:  
18-digit TweetID

The text of the Tweet you want to lookup:  
Tweet content (text only)
